

FinLit | Wireframe

FinLit is a financial literacy platform that makes complex financial topics simple and actionable. It offers structured modules, market insights, and practical tools for smarter financial decision-making. The platform serves learners globally across multiple industries and experience levels.

This interface was created in Figma using layered components to separate the header, main content, and background; this helps ensure a clean layout with easy maintainable adjustments.

Six Sectors • Six Global Hubs

Global Financial Landscape
